

School is closed

School has been closed because of the  flood.

To keep people safe, the roads have been closed and  some people have had to  leave

their home.

A flood can happen when there is too much rain and no more room in the  drains.

The drains become full and the water stays on the roads and in the fields and sometimes it will go into houses and other buildings.

The fire service don't just go to fires, they help to rescue people who may get stuck

in their homes when there is a flood.

Soon, the water will drain away and we will be able to go back to school.

The adults who look after me will tell me when school opens again. They will all help to keep me safe.
